

**A WRITE ELEMENT HAVING A NARROW WRITER POLE
DEFINED BY ION IMPLANTATION**

ABSTRACT OF THE DISCLOSURE

5 A write element includes a return pole that is separated from a
writer pole by a writer gap layer. The writer pole has a width and a
magnetically active region adjoining a first magnetically dead side wall.
The magnetically active region defines a track width of the write
element, which is less than a width of the writer pole.
